

INTERNATIONAL STUDENTS – STUDENT ADMISSION AND ENROLLMENT

J-841

In recognition of BTC's efforts in international education, international students will be provided an opportunity to participate in courses and programs offered by BTC. Students from other nations may enroll in BTC courses or programs where excess capacity exists or where additional capacity can be created unless the District agrees to a contract for services providing for completely dedicated courses at full cost recovery as defined in Section 7 of the WTCS Financial Accounting Manual. However, enrollment of international students shall not displace or reduce the instructional access of resident students. The maximum number of international students enrolled at BTC, at any given time, shall not exceed 20 full-time equivalent students unless they are enrolled in a dedicated contract for services at full cost recovery, approved by the District Board.

All international students shall comply with all applicable U. S. Citizenship and Immigration Services (USCIS) regulations and all admission requirements established by BTC for enrollment into a particular course or program. International students shall be charged the out-of-state tuition and fees consistent with state statutes and administrative rules related to the charging of tuition and fees.
