

Ten Great Reasons to Attend a Technical College

1. Great-paying careers in two years or less

Median salaries of new associate degree graduates are over \$32,000. And, two-thirds of the fastest growing occupations require technical education.

2. Strong job placement

Only six months after graduation, 92% of Wisconsin Technical College graduates are employed; 76% in their field of study.

3. Affordable tuition means less debt

Wisconsin technical colleges have the lowest tuition among public post-secondary institutions. Convenient locations often eliminate the need for room and board, saving you thousands of dollars. The ability to receive your degree in less time also results in major cost savings.

4. More career choices than ever

Wisconsin's technical colleges offer more than 300 programs from which to choose at 16 colleges.

5. Flexible class scheduling

Class scheduling is very adaptable for students who have busy work schedules or family responsibilities. Many weekend, evening, and Internet courses are available.

6. Instructors with real-world experience

Helping students learn is our top priority, with college instructors bringing a wealth of "real-world" work experience to the classroom.

7. Hands-on learning

Students are provided with "real-world" environments and experiences to prepare themselves for their careers.

8. Smaller class size

Smaller class sizes allow for more one-on-one interaction with instructors and more personal attention for students.

9. Great people and social activities

Meet friendly people and broaden your social horizons. Take part in lively classroom discussions, student activities, and student clubs and organizations.

10. Credit transfer to four-year programs

An agreement with the University of Wisconsin System allows the smooth transfer of credits from many technical college programs to four-year state universities in Wisconsin.
